We often call the creatures in the animal kingdom – «Our little brothers».

But do we know that our brothers love to help us and try their best to be like us?

We explore this theme in this amusing photostory.

*Sometimes our little brothers
are willing to do a lot more
for us than we think.*

For example, these cute little creatures are always ready to help a clumsy girl find a ring dropped into the water.

*They like to call us
for breakfast,*

...or for lunch.

They can be taught to epilate our legs.

They love to amuse us on the shore,

...and under the water.

They
allow us
to admire
them,

*... and even pose
to take photos
together.*

*Sometimes, they take care
that we don't spoil our big...*

...or small fish.

*They can also help us in get rid
of excessive grain,*

...seeds,

...and also other high calorie
sweet treats.

*Sometimes
they attempt
to imitate us,*

*...to the limits
of their ability
of course.*

Why do we
wonder if
even trees
sometimes
aspire to
resemble us?

It is possible to play different games with our little brothers. For example this game is called “Guess who is feeding you?”

*...and with whales we can play
the game “Who will blink first”.*

*But whales are tricky – they do not blink.
That is why you, as the loser, will always have
to jump into the cold water afterwards.*

*In bringing us all that joy our little
brothers ask almost nothing in return.
Well, may be a few bits of leaves,*

...a couple of fish,

...or an extra sausage.

However, afterwards they allow
our rough hands to stroke
their delicate fur,

*...and do
many
different
things
with them.*

*Their noble and considerate agreement
to play the stupid game “corrida”
means a great deal to us!*

*Overall, our little brothers
are as good as gold!*

It is no
wonder that
sometimes
people make
different
animal
sculptures,

*...which they
enjoy visiting
time to time.*
