There are more than three billion women on Earth. It is only logical that we men must understand their habits and rituals so that we may coexist with them comfortably.

*So what  
do we really  
know about  
women?*

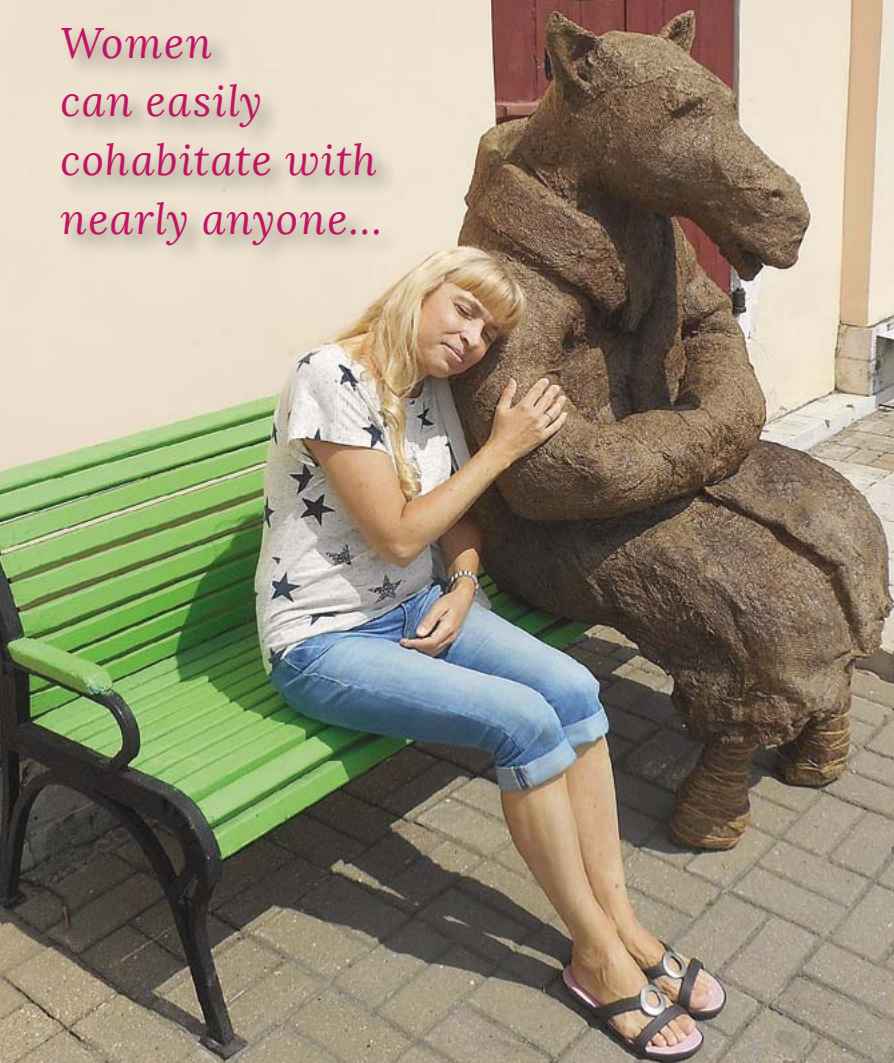

*It'd be better  
to start with  
a warn-  
ing: not all  
women are  
tolerant  
to criticism.*

Also we tend  
to think that  
we are cunning.  
But the  
truth is quite  
different.

Women  
can easily  
cohabitate with  
nearly anyone...

...anywhere...

*...in any  
condition  
and mood.*

There are no  
cases in his-  
tory where  
women  
couldn't find  
a common  
language  
with anyone.

*Even if they feel “hot” sometimes,  
they know exactly what to do!*

Generally speaking, women are beautiful. But sometimes they are dressed and made up in such a way that...

*They also like to take up all of mens favourite places with their things.*

*Many men try to make sense of the way women think. However if they try to delve too deep this often does not end well.*

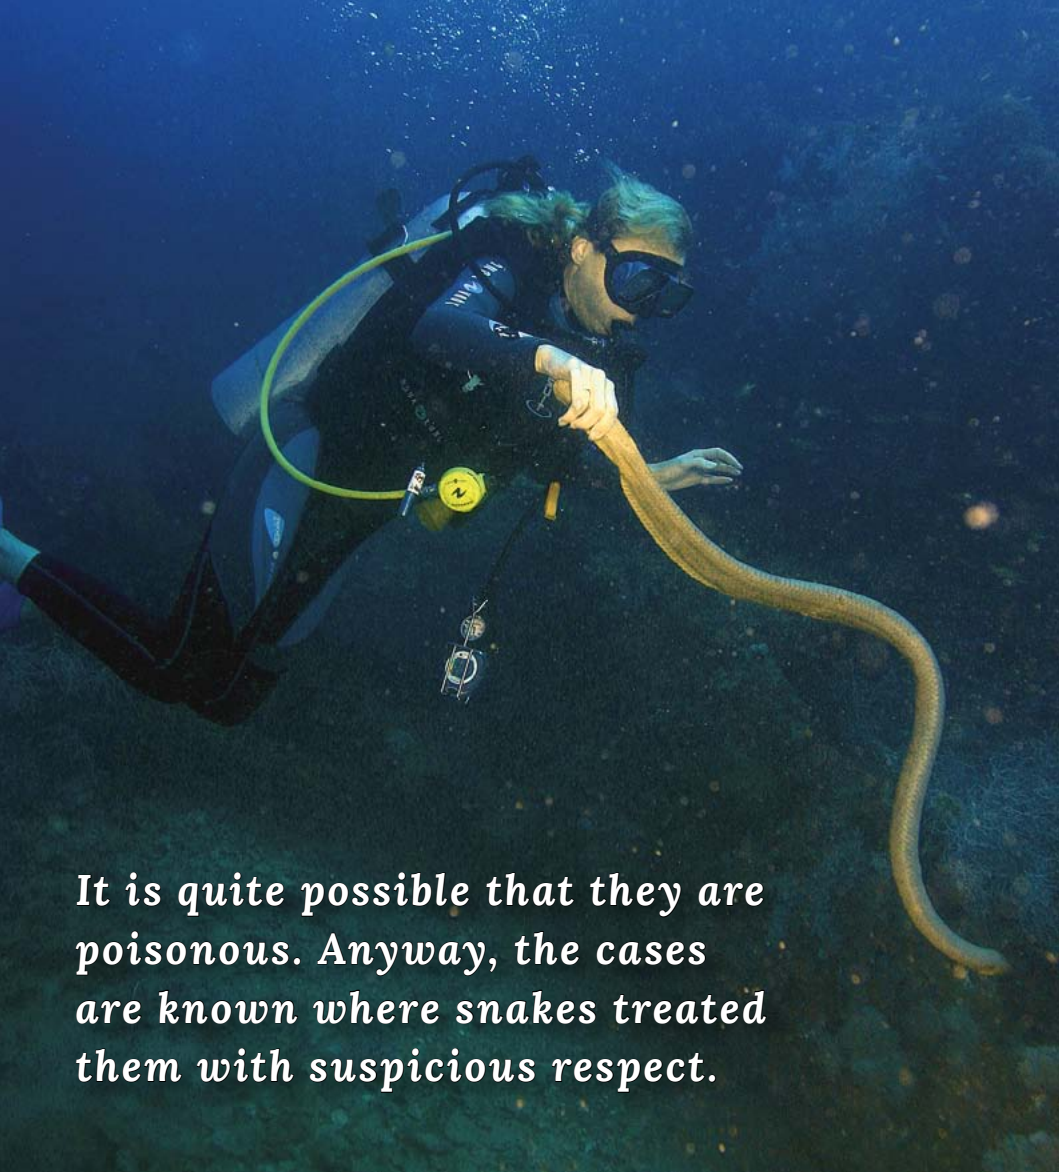

*What is more, you should never ask  
a woman about the way to go – other-  
wise you may never be seen of again.*

*Also these creatures are able  
to communicate with anyone and  
find in any conversation something  
very important to themselves.*

Only  
a woman  
can easily  
and inoffen-  
sively explain  
to any travel-  
ler that this  
is her well.  
And then tell  
nicely where  
there is  
another well  
in the desert.

*It is quite possible that they are  
poisonous. Anyway, the cases  
are known where snakes treated  
them with suspicious respect.*

*Also women like listening  
to various advice from all kinds  
of sources. And then they enjoy  
retelling it to us. Especially before sleep...*

These creatures also like to dig around in everything,

*(although to be fair, there have been instances where they have been able to uncover something good.)*

*Women love feeding everyone...*

*And, in fact, it doesn't really  
matter who or with what.*

*The main thing – is that everyone eats!*

*And now about a woman's greatest fears.  
Firstly women are very afraid of getting  
fat. More than that they are afraid  
to end up without any cakes or treats.*

They also  
panic if they  
think they  
might miss  
an oppor-  
tunity to go  
shopping.

*The final and frightening enemy  
of women is – logic. They always run away  
from it at the greatest possible speed.*

*Women also love to read or watch  
all sorts of romantic stories (while  
at the same time loading us up with  
a variety of necessary chores).*

*These creatures never give up  
their attempts to worm their  
way into our confidence.*

*Women have other differences than men. Generally, they differ in colour and length of their hair.*

However,  
it is worth-  
while noting  
that women  
somehow  
manage  
to bring a ray  
of light into  
the dullness  
of our mens'  
lives.

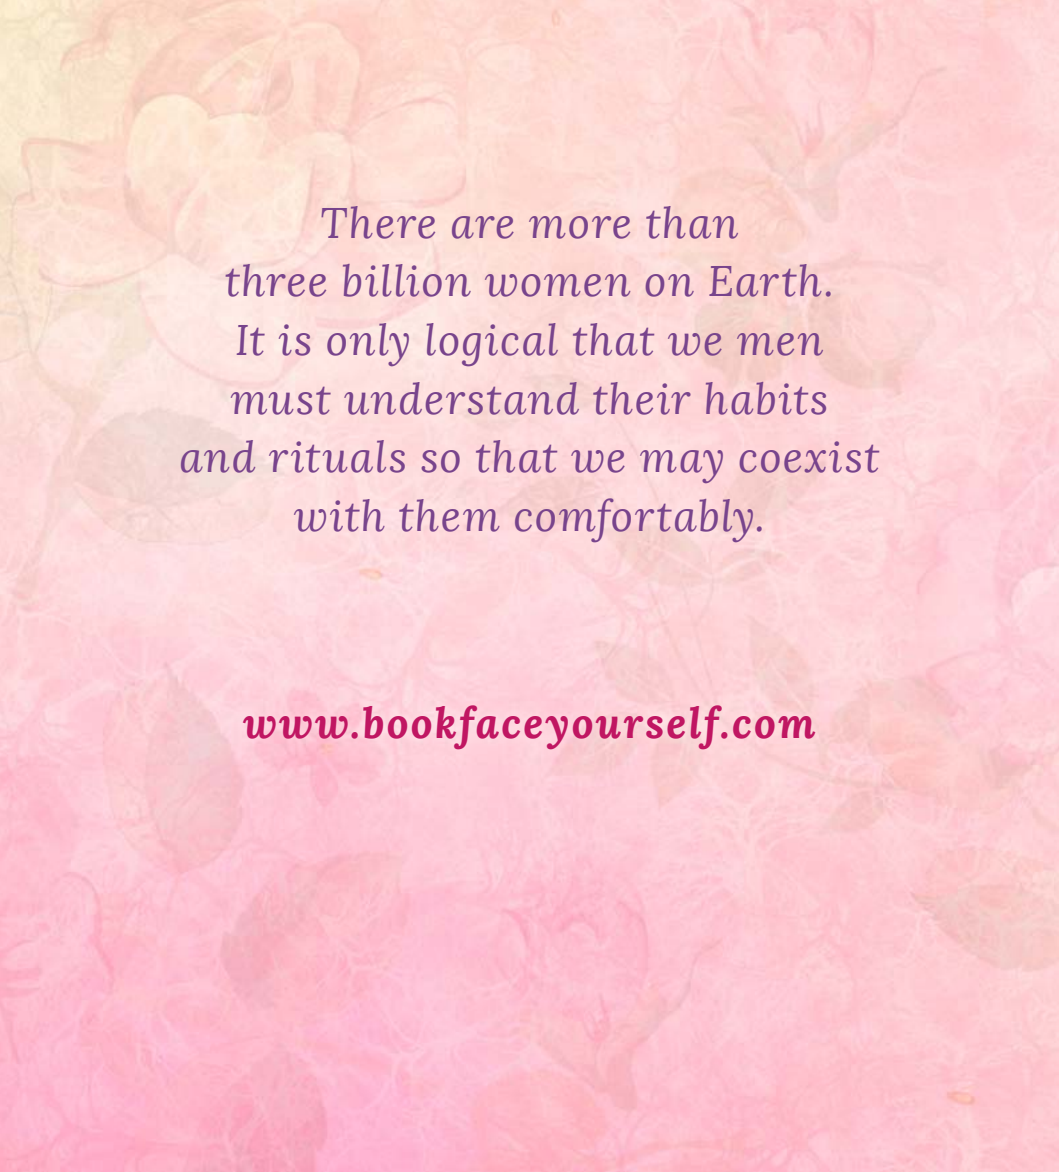

*And that of course is a paradox.  
Paradox, which needs to be further  
considered and which will be  
the subject of a next guide for men.*

# *What do we know about women?*

*A pictorial guide for men*

The background of the entire image is a soft, textured pink with faint, overlapping floral and leaf patterns in shades of light pink and pale yellow.

There are more than  
three billion women on Earth.  
It is only logical that we men  
must understand their habits  
and rituals so that we may coexist  
with them comfortably.
