OCEAN P L A N E T

A photo story

“Zolotoye sechenie”

2 0 1 9

An aerial photograph of a rugged coastline. The sea is a deep blue-grey, with white foam from breaking waves visible along the shore. The land is covered in dark, mossy rocks and patches of green vegetation. The perspective is from directly above, looking down at the ocean and the rocky beach.

There are many interesting things in the world. But
what can be compared to the beautiful and mysterious
Ocean-planet?

*There are always
things to do
in this life.*

For example, you can swing
on a swing,

...begin to do fitness,

*... and even have a go
at cardio ballet.*

You can
arrange your
personal life

*(they say that sometimes,
it does not end in a bad way).*

However, many true romantics think about the sea more than anything else and reach for it.

*Those who do not have a ship
walk on foot near it.*

*And those who have something sail,
sometimes jumping with joy.*

*As for people
who have
neither sea
nor ship, they
sadly sit on
the shore and
save money
for all this.*

*And here,
a quite
logical
question
appears:*

*...what is so special
they find in this sea?*

*Why don't other doors in this life
attract them as much?*

*The answer here is simple.
The Ocean is often compared
to a large, little-studied planet.*

And, as you
know, all
the planets...

...possess strong gravitation.

*Therefore, the influence of the Ocean
is felt even far away from it.*

*It penetrates the homes
of sea lovers and reaches...*

...the most secluded corners
of the land.

And it is not by accident,

*...the Ocean always has
something to show people.*

*Over the centuries, the Ocean
has inspired various sculptors,*

...abstractionists,

...architects,

...and others.

*There are
a great deal
of surprises
that the Ocean
prepares
for those ...*

...who dare
to touch it
deeper!

*However, only
the Ocean itself
knows about
this in detail...*

*...and those, who are trustingly
immersed into it...*

Ocean planet

A photo story

An underwater photograph looking down towards the ocean floor. Sunlight filters through the water, creating bright, circular patterns on the sandy bottom. Numerous small, dark fish are scattered throughout the water column. The water has a deep blue-green hue.

*There are many interesting
things in the world.*

*But what can be compared
to the beautiful and mysterious
Ocean-planet?*
