# What do we know about women?

## II

Igor Bondar

# *What do we know about women?*

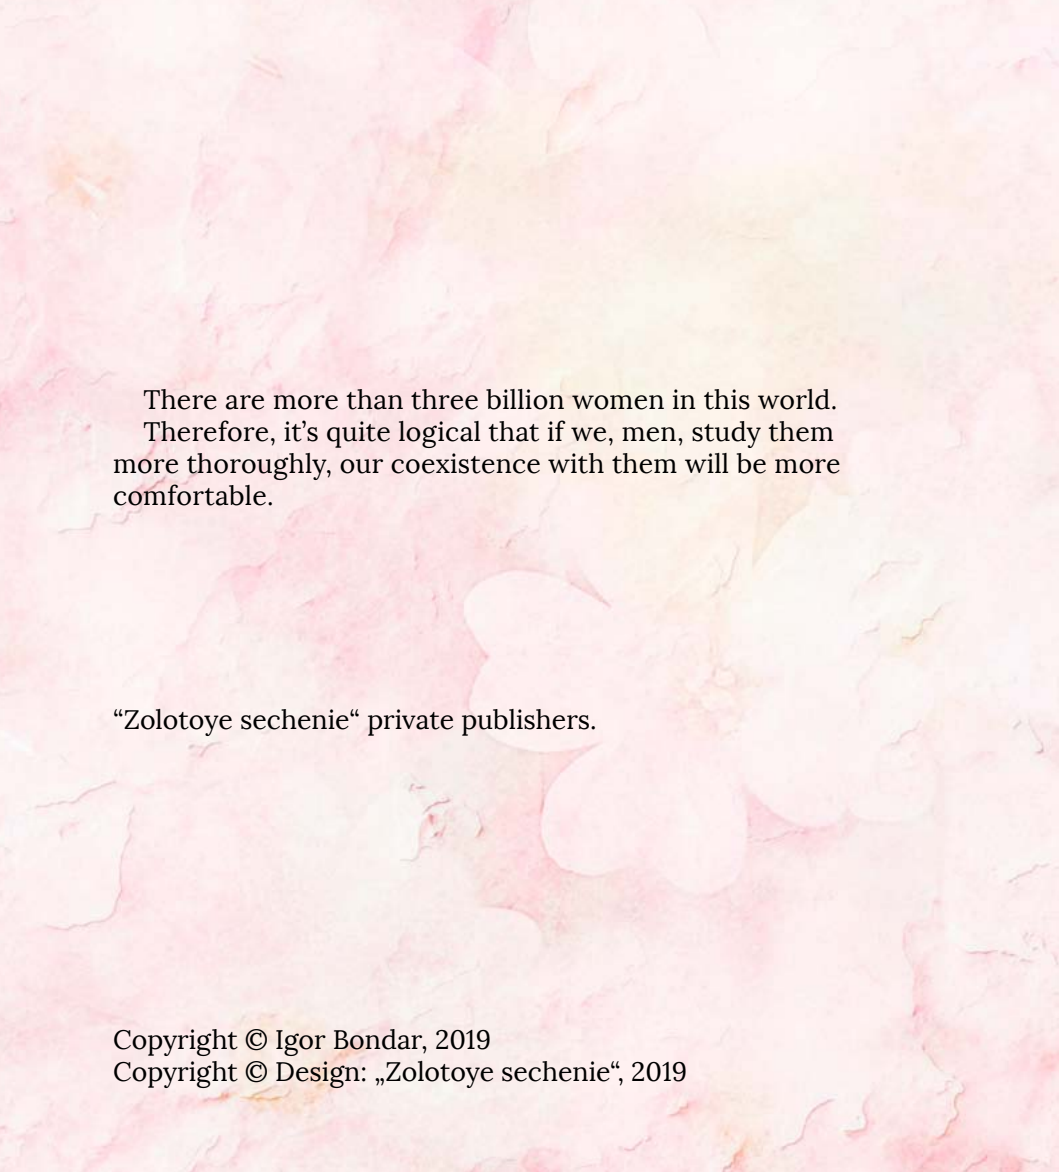

Book 2

A photo story

“Zolotoye sechenie“  
private publishers

2 0 1 9

The background is a soft, abstract watercolor wash in shades of pink and light yellow. A large, delicate pink flower with five petals is positioned on the right side of the page, partially overlapping the text area.

There are more than three billion women in this world.  
Therefore, it's quite logical that if we, men, study them  
more thoroughly, our coexistence with them will be more  
comfortable.

As promised, we decided to continue studying women. However, this time, the task was more difficult than it seemed.

*Women for some reason immediately  
refused to reveal their secrets,  
and we were faced with full silence.*

*Our perseverance only caused  
their stiff resistance.*

*As a result, not all of us made it  
to the release of this book,*

*...and some of the survivors  
were not much luckier.*

*Only the most resilient of us,  
who strictly followed safety precautions,  
managed to complete this study.*

*All this time, we lived only  
in reliable and safe places.*

*After a number of setbacks, we changed tactics and began to look for new «keys» to women in order to get them talking.*

*For some of them, we predicted a career in the movie industry,*

*...for others – acquaintance with  
handsome and rich princes.*

*After that, the process  
started – they got talking!  
So, what new thing did  
we learn about women?*

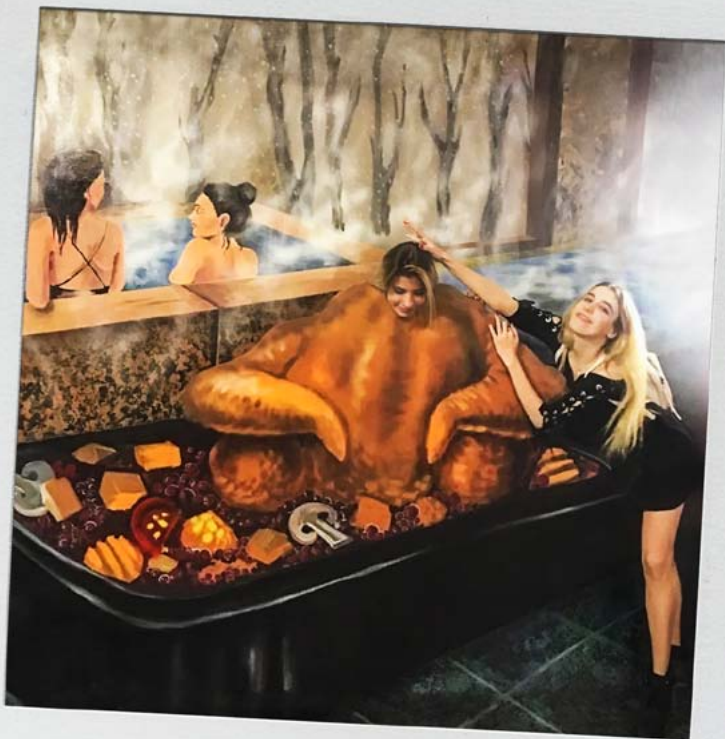

*Well, first of all, women  
are incredibly curious.*

And this  
often leads  
them  
to places...

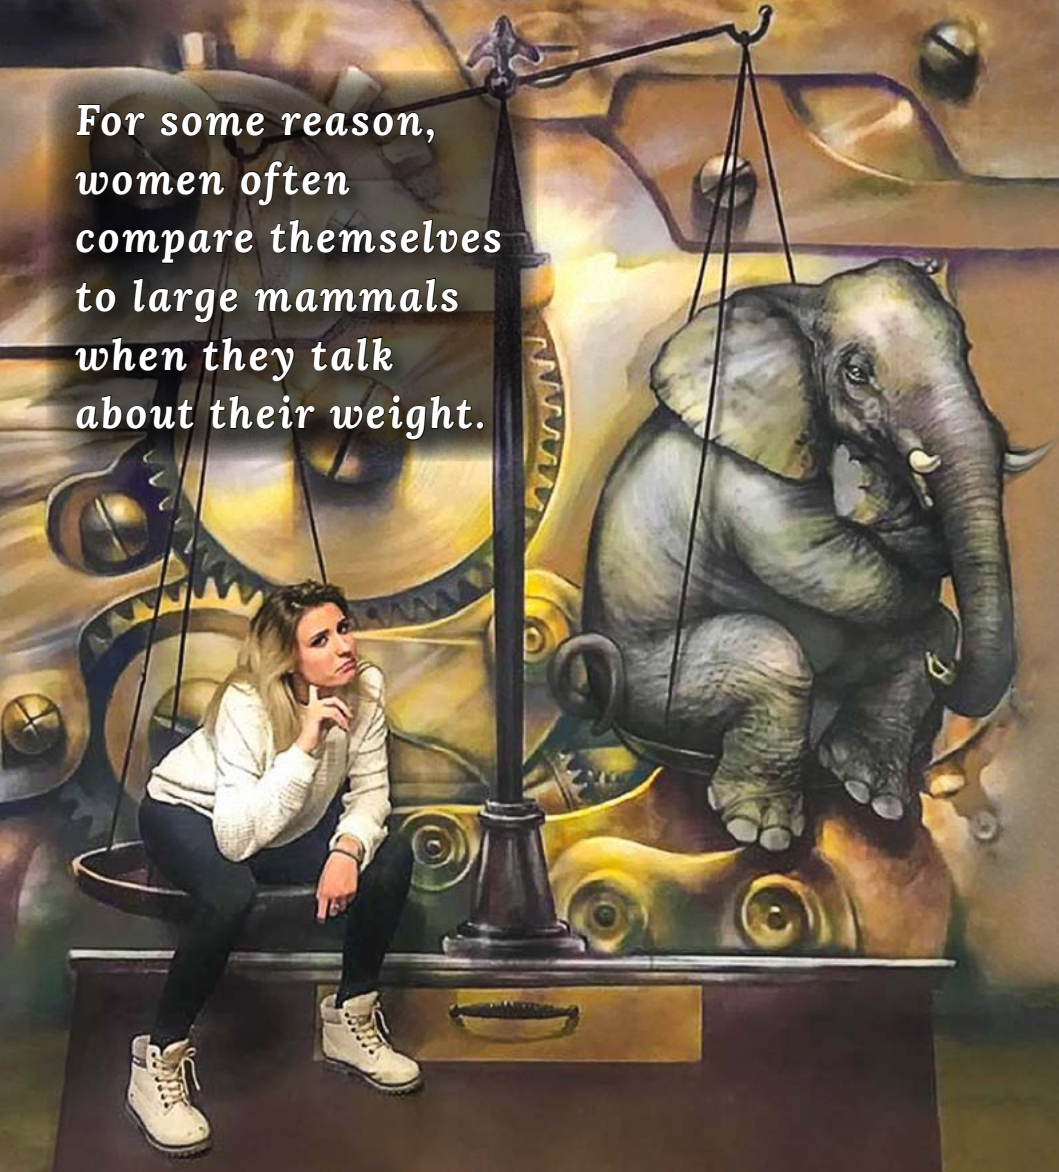

...where it's better  
for them not to be...

It also turned out  
that women appreciate style  
and charisma more than appearance.

For some reason,  
women often  
compare themselves  
to large mammals  
when they talk  
about their weight.

Besides, women proved to be quite vindictive. If one of them, for example, made a bad joke about another, the other immediately...

...thinks of a good way to pay back.

The theory of the poisonousness of women  
has not been confirmed yet.  
However, that they are definitely attracted  
to some reptiles – is a fact.

*It was determined that  
more than anything,  
women like to dream about  
great and beautiful love.*

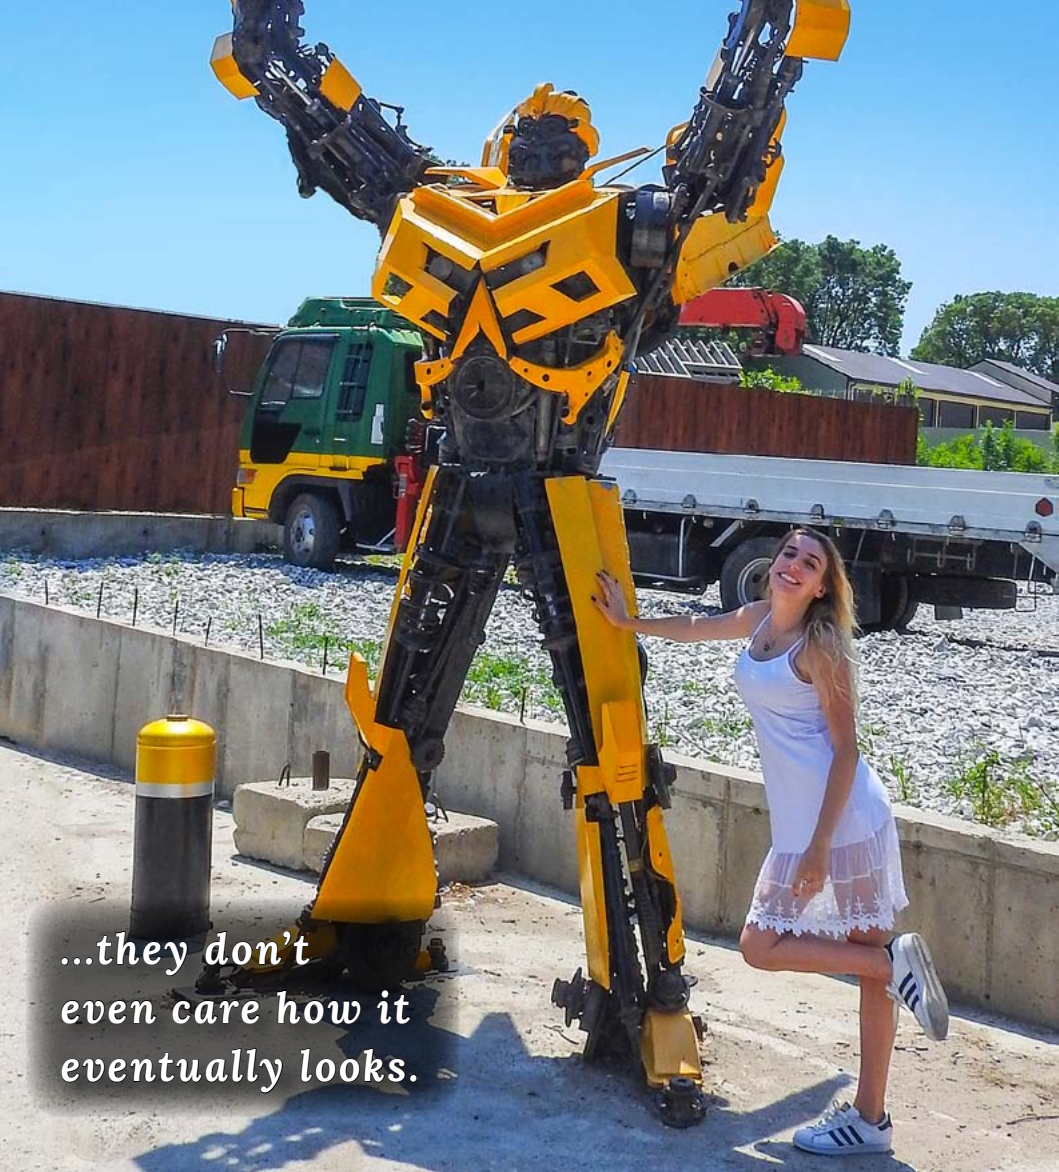

(by the way, they can talk  
about this even more...)

In search for such love,  
they are ready to go anywhere.  
And, at the same time...

...they don't  
even care how it  
eventually looks.

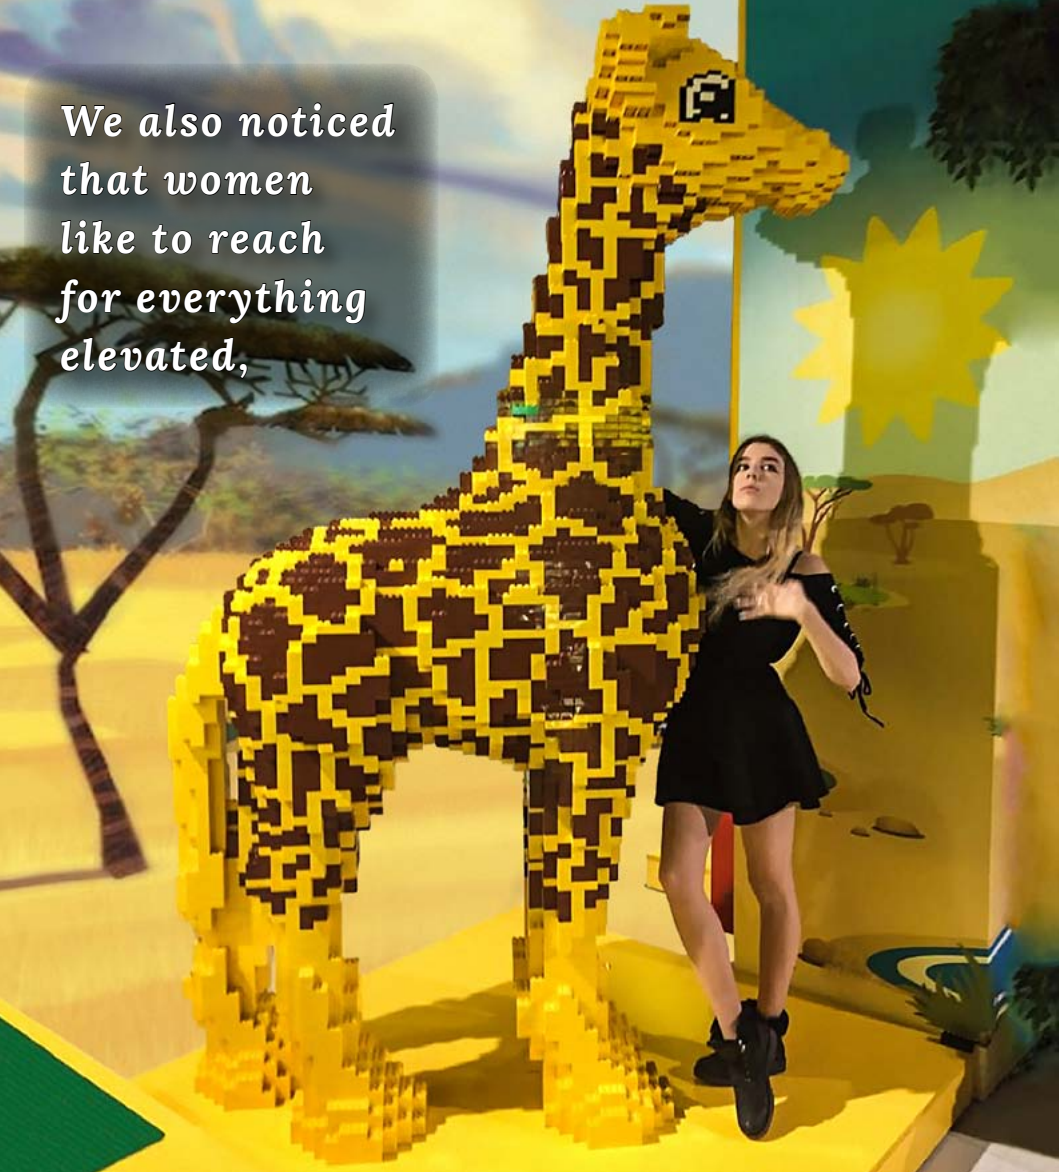

*They don't really  
care about it!  
The main thing –  
love must be great  
and beautiful.*

*We also noticed  
that women  
like to reach  
for everything  
elevated,*

*... and even more they like  
to participate somehow.*

*Women can quickly cheer themselves up. For this, they just need to dream a little about a new haircut,*

*...or try out a brand-new  
lipstick somewhere.*

Oh, one more thing! Once, we witnessed something very unusual. Perhaps, it was some kind of IQ test.

Well, that's all, dear men,  
that we've so far managed to learn for today  
about our least-studied neighbours  
on this earth – about women.
